

267

Heavy duty rollers

Set for containers with ISO corners up to 6 t total weight

Roller sets series 267 up to 6 t load.

With tow bar and multi-functional part.

Each roller unit can be universally set and operated as steerable or fixed roller. The multi-function part is used for storing the tools as well as a for easy installing and supporting the steering. The roller installation into the ISO-corners from underneath ensures high reliability.

The side openings of the ISO corner remain free for other use.

- Installation on the underside of the container via the ISO corner
- No own drive, travel only with a towing vehicle
- Installation on the container with the aid of the multi-function bar.
- 4 roller units
- 1 drawbar
- 1 or 2 multifunctional bars
